Relatively deep alluvial based soils of medium texture with a mix of limestone and sand. Dark soils with a good content of organic matter.

WINEMAKING:

Grapes are de-stemmed crushed and the resultant must is rapidly chilled to 8°C on its way to the pneumatic presses. Some portions of the fruit are given skin contact in order to extract flavor and body. After pressing to under 1 bar, the juice is cold settled prior to the fermentation with selected yeasts at 15-18°C.
